To specify a motor from the catalogue for price and delivery indicate the Part Number below. The part number e.g. Z-0100-015-2-XXX, where Z indicates a regular motor, and an AZ would indicate an inside out motor. The number 0100 indicates a 1 inch outer diameter, the number 015 indicates a 0.150 inch stack height, the number 2 indicating a ??winding, and XXX indicating a redundant or non-redundant winding parameter (see redundant/non-redundant charts on specification pages).

If a special motor is require please fill out the information requested below and we will respond with a suitable design proposal for your application.

Please send me price and delivery information for P/N _____
 for a quantity of _____ units.

If further details are required please contact our sales personnel at (631) 231-9100 and ask for sales.

CUSTOM DESIGN INFORMATION

Describe Application

Maximum Dimensions:

(as much as is known)

O.D. _____
 Stack Length _____
 Overall Length _____
 Coil Head Length _____
 I.D. requirements _____

Performance Requirements:

(as much as is known)

Peak Torque _____ Load Point Torque/Speed _____
 Peak power _____ Kt _____
 No load speed _____ Voltage Limits _____
 Speed vs torque _____ Other _____
 Resistance _____
 Winding Type _____

Environmental Considerations

Speed vs torque _____ Other _____
 Resistance _____
 Winding Type _____
