

February 7, 2001

Dear Customer:

Thank you for your interest in, and use of Aeroflex UTMC Standard Products, specifically the UT69151 S μ MMIT XTE Standard Microcircuit Drawing (SMD) 5962-94758, device types 07, 08, and 09. The purpose of this letter is to our customers that Aeroflex UTMC has completed qualification of a new die supplier for the S μ MMIT XTE's internal memory.

We began shipping S μ MMIT XTE's with the new memory die in December 2000. Revision C S μ MMIT XTEs, with the new memory die, are fit, form, and function replacements to revision B. Revision C indicates a memory change only.

Please note, the following quiescent current specification change has been made to the SMD and the S μ MMIT Product Handbook:

Revision B	Quiescent Current	QI _{DD}	15ma
Revision C	Quiescent Current	QI _{DD}	20ma

Aeroflex UTMC will continue to offer the S μ MMIT XTE to the existing part number UT69151XTE, and SMD part number 5962-94758.

Please contact me at (719) 594-8252, or via e-mail at jordan@utmc.aeroflex.com if you have any questions.

Regards,

Anthony Jordan
Director of Standard Products
